

## Do you want to upgrade your heating plant to a CHP plant?

Welcome to listen to the heating company Finspångs Tekniska Verk AB who will tell you about the decision to invest in a 500 kW ORC turbine for local and weather-independent electricity production

We want to invite you to another opportunity to visit one of our ORC installations. This time at Finspångs Tekniska Verk AB, which is Sweden's first waste-fired CHP plant with a turbine below 500 kW electric power.

**The visit will be held both on site and digitally so that as many as possible can participate.**

During the visit, you will have the opportunity to listen to the heating company Finspångs Tekniska Verk, who will talk about their experiences from installation and operation of the ORC turbine. You will also be able to see the ORC turbine on site and listen to Againity who are going to talk about the ORC technology and electricity production from 50 to 2500 kW.

**Date: Thursday, September 8<sup>th</sup> 2022**

**Time: 10.00-12.00 CET(Swedish time) – Lunch for those who attend in person between 12.00-13.00**

**Location: Leverstorpsvägen 10, 612 44 Finspång, Sweden / Teams**

Register by replying to this email no later than Friday 2<sup>nd</sup> September. Enter the name, email address and telephone number of each person attending and if you wish to participate on site or digitally. You are welcome to contact us with questions and concerns regarding the study visit or the ORC technology by phone or email (contact information can be found below). Attached is also a brochure that gives an introduction to the technology.

Welcome!
